SUMMARY

Product designer with a UI/UX, product thinking, and cross-disciplinary engineering background. I work closely with POs/PMs and stakeholders to clarify the problem, converge on a direction, and turn it into precise, shippable user experience. My work spans B2B AI energy management, quantitative trading, and Web3 services, covering user research and interviews, competitive analysis, wireframing/prototyping, interface and interaction design, design systems, and cross-functional collaboration. I also bring AI tools into design, front-end prototyping, and product spec work to frame problems, design MVPs, and validate business goals against user experience.

EDUCATION

National Chengchi University (NCCU)

Taipei, Taiwan

Master's degree, Digital Content and Technologies • Sep. 2023 – May 2026 • GPA 4.07

Focus: User-Centric Design, Human-AI Interaction, AI-driven Design

National Cheng Kung University (NCKU)

Tainan, Taiwan

Bachelor's degree, Mechanical Engineering • 2017 – 2021

Minor focus: Design Thinking, User-Centered Design

WORK EXPERIENCE

Advantech

Taipei, Taiwan

UI/UX Design Intern

Jun. 2024 – Aug. 2024

- Worked with the PM and team to reframe the AI entry point from "what it can answer" to "when it should surface," addressing a platform where the data was complete but the priorities were not.
- Overturned the team's "ask-anything chatbot" assumption through competitive analysis, user interviews, and internal workshops; delivered **three design proposals within 2.5 months**, passing senior leadership and CEO reviews on schedule.
- **Two core feature modules approved** into the engineering roadmap; partnered with the PM to prioritize the product roadmap.

Crypto-Arsenal

Taipei, Taiwan • Remote

UI/UX & PM Intern

Mar. 2023 – Oct. 2023

- Integrated three core trading flows into the platform, removing the risk of users breaking their own running strategies to intervene manually — **cutting average task time by 58%**.
- Reorganized the design system, unifying three major feature areas across **20+ design flows**; delivered 6+ features and 20+ responsive pages, and resolved 12+ UX issues.
- Served as assistant Product Owner in Scrum, introducing a Scrum board and prototype videos to improve design handoff and help engineers grasp design intent faster — **increasing Sprint output to 1.5x its previous level**.

Taiwan Blockchain Academia

Taipei, Taiwan • Remote

Product Designer (Contract)

Nov. 2022 – Feb. 2023

- Led user research and wireframing for a DID digital credential platform; when participants turned out to have no real experience with digital credentials, shifted the interview guide to **exploratory research** — probing decision concerns and execution barriers rather than feature detail.
- Ran **9 role-based interviews** across issuers, applicants, and verifiers, correcting the team's assumption: verification was a value-add rather than a must-have, which narrowed the product positioning.
- Collaborated with the PM and Cathay Financial Holdings' technology team to deliver wireframes and Figma interactive prototypes, completing a full-platform walkthrough.

LCFC (Hefei) Electronics Technology Co. Ltd

Taipei, Taiwan

Assistant Project Manager

May. 2021 – Dec. 2021

- Coordinated engineering, suppliers, and cross-functional schedules to deliver **an average of 1.5 weeks ahead of plan**.
- Responded to material shortage risks across two milestones, rescheduling components and testing to bring potentially delayed deliveries back on track.

SKILLS

Figma | User Experience (UX) | Product Design | User Research | Wireframing | Prototyping | Design System | Human-AI Interaction | AI-Assisted Design & Coding | Scrum | User-Centered Design | Mechanical Engineering
